**Building your financial program**

For most, achieving and maintaining financial strength is a lifetime pursuit. It involves planning, preparation, performance and follow-through during all of your life stages.

**Protecting assets**

The first priority is protecting what you have, including your standard of living, through insurance programs for individual, family and business needs.

**Increasing net worth**

Next you'll want to expand your financial resources through diversified investment programs—mutual funds, stocks, bonds, annuities, money market funds, limited partnerships, unit investment trusts and other products—depending upon your financial objectives.

**Managing accumulations**

Finally, the timely effective management of accumulations—including transfers of assets and estate planning—is vitally important to the continuous goal of achieving your lifetime financial strength.
